

Phase 3

Expectations

// FLATIRON SCHOOL

Agenda

1. **Phase 3 Overview**
2. **Week 1: Math & Classification**
3. **Week 2: More Models!**
4. **Gating / Assessments**
5. **What Will Phase 3 Feel Like?**

Phase Overview

Statistics

PHASE 2
Weeks 4 - 6

Advanced Topics

PHASE 4
Weeks 10 - 12

PHASE 1
Weeks 1 - 3

Data Engineering

PHASE 3
Weeks 7 - 9

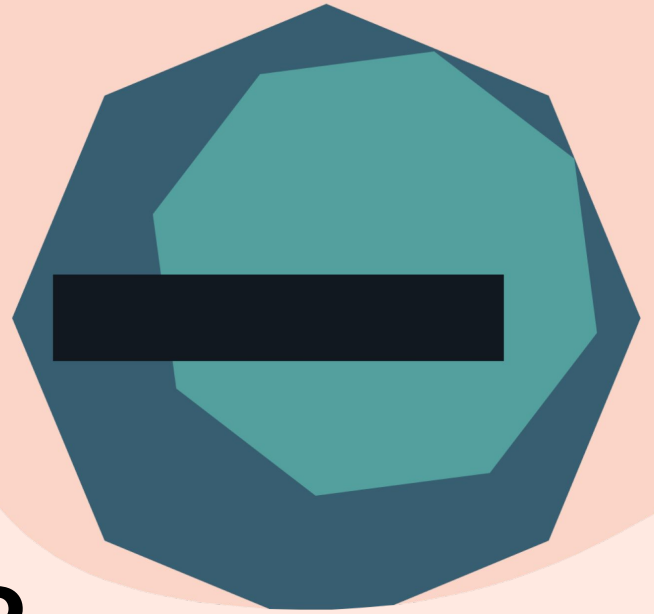

Machine Learning

PHASE 5
Weeks 13 - 15

Capstone

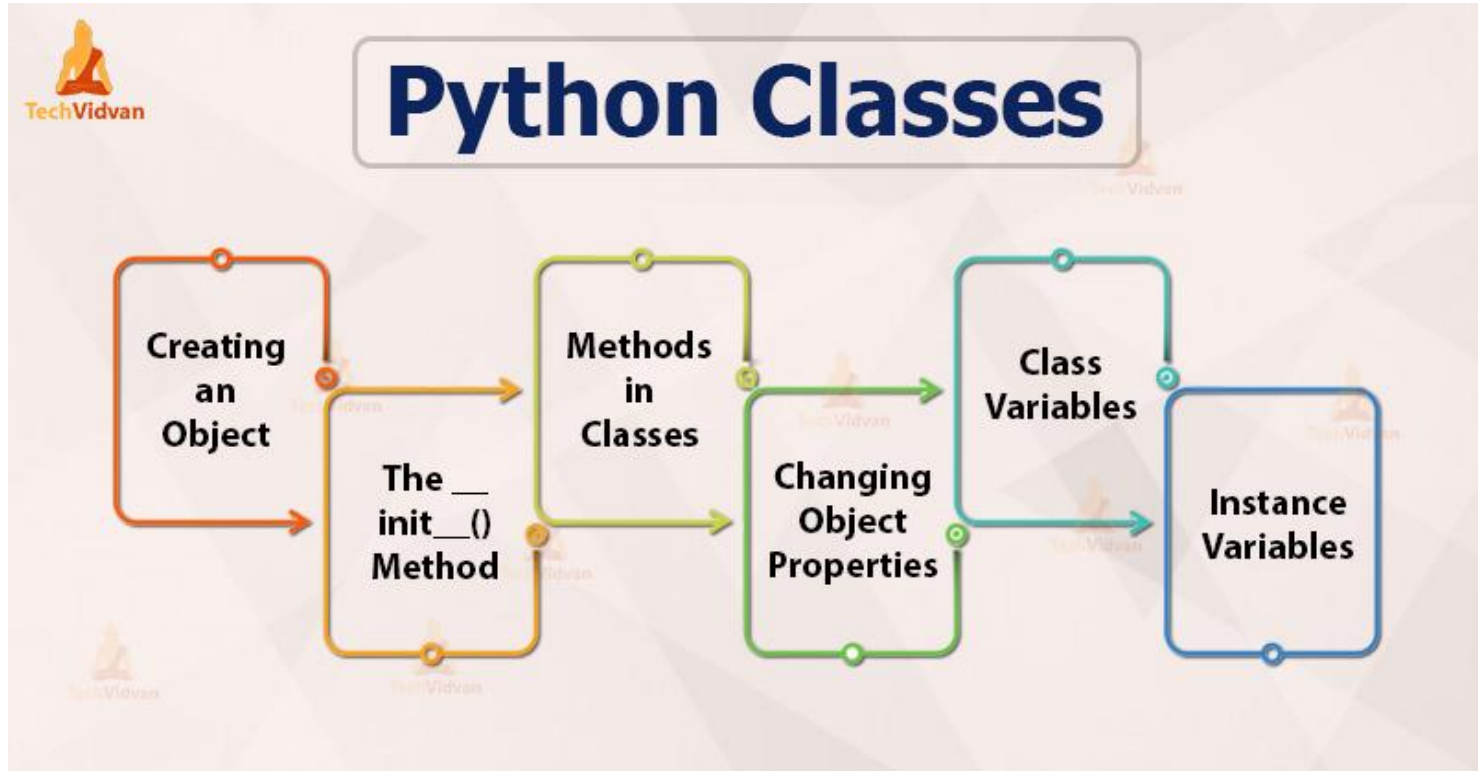

Week 1

**More Linear Regression,
Predictive Modelling, OOP,
Little bit of Math**

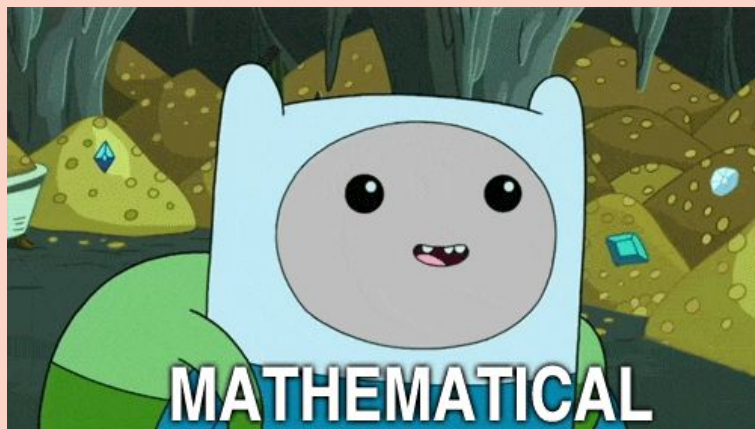

// FLATIRON SCHOOL

Object-Oriented Programming

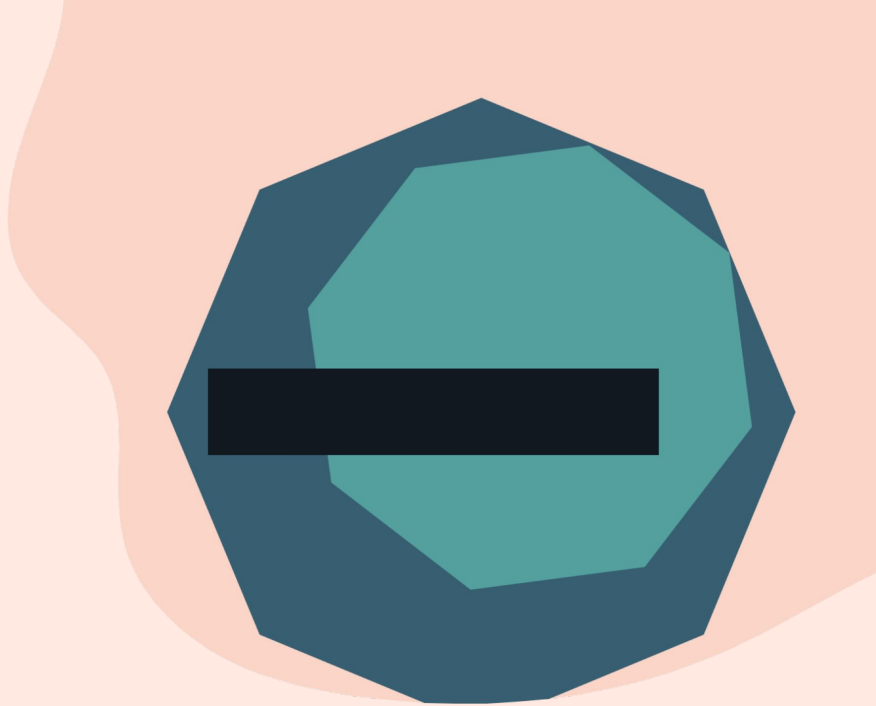

The Math Behind Data Science

- Linear Algebra
- Calculus, Cost Functions, Gradient Descent
- Focus on concepts and application!

Week 2

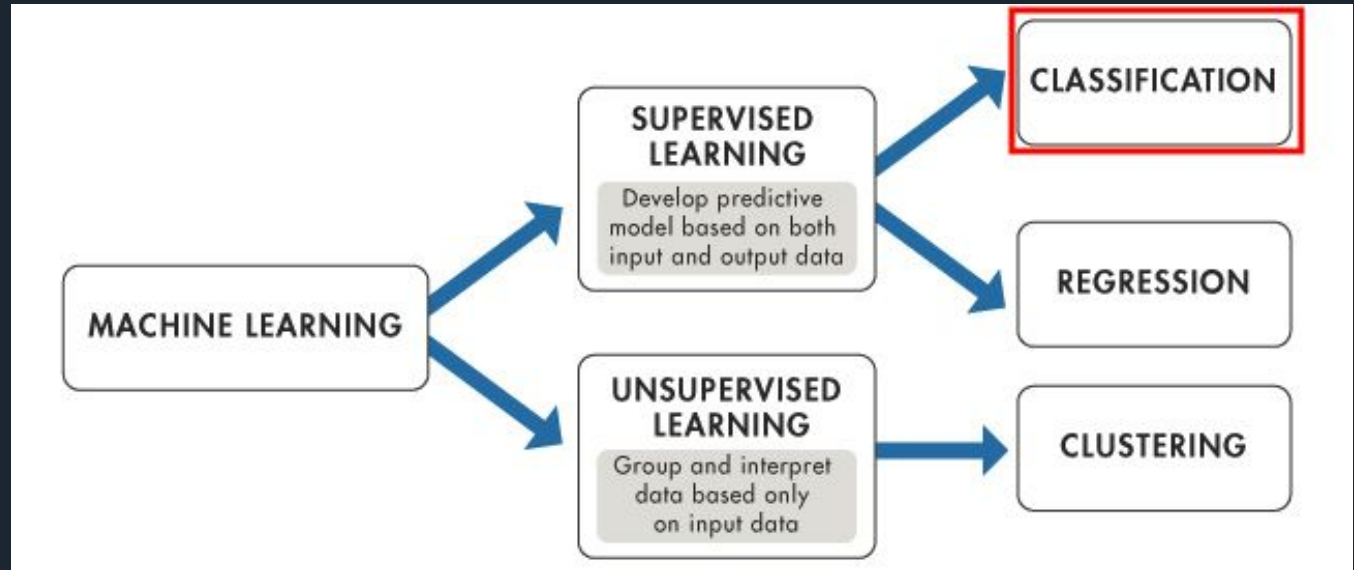

Logistic Regression, Model Tuning, Evaluation

// FLATIRON SCHOOL

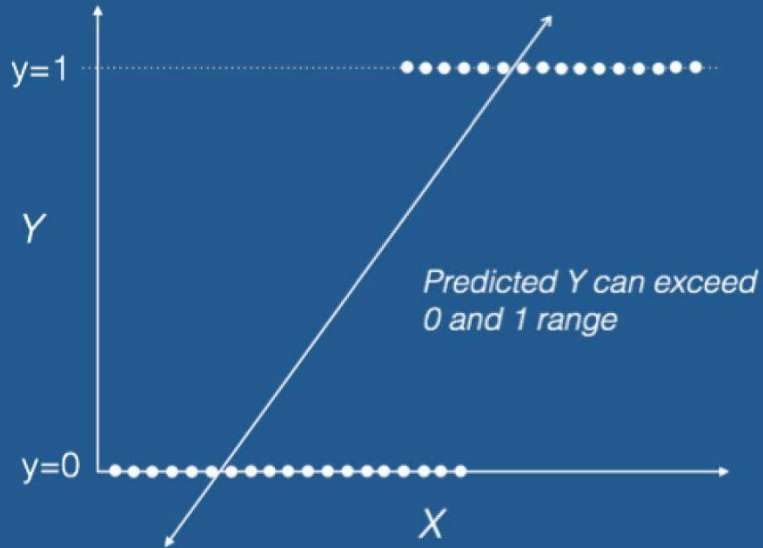

Classification

- Asking: Is it ____ or not?
- From continuous target to categorical target

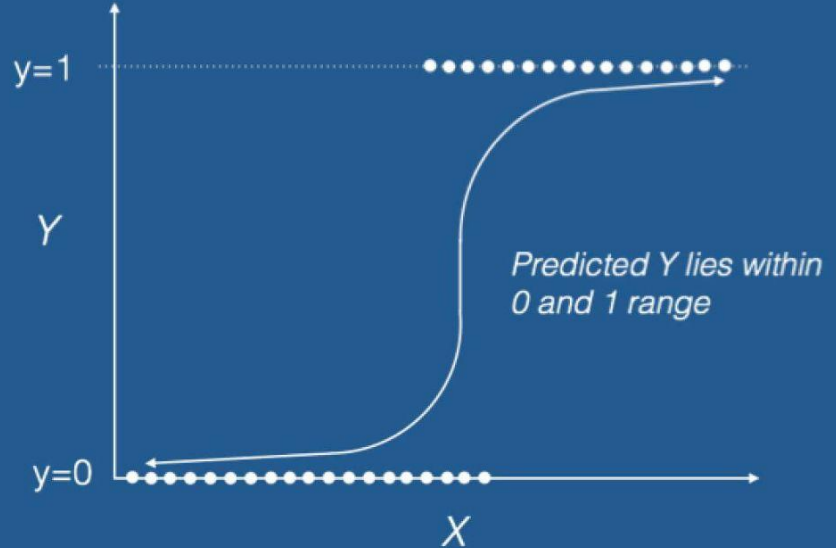

Logistic Regression

Linear Regression

Logistic Regression

Classification Metrics

- New type of target - so, new metrics!

		Predicted		
		Negative	Positive	
Actual	Negative	True Negative (TN) Type I Error	False Positive (FP) Type I Error	Specificity $\frac{TN}{(TN + FP)}$
	Positive	False Negative (FN) Type II Error	True Positive (TP)	Recall / Sensitivity $\frac{TP}{(TP + FN)}$
		Negative Predicted Value $\frac{TN}{(TN + FN)}$	Precision $\frac{TP}{(TP + FP)}$	Accuracy $\frac{TP + TN}{(TP + TN + FP + FN)}$

Student Progress and Assessments

Blog Post

Due next Tuesday (8/15)

- Write a tutorial with code
- See next slide

Checkpoints

1. Tuesday 8/8: Linear Regression
2. Thursday 8/10: OOP
3. Monday 8/14: ML Fundamentals
4. Wednesday 8/16: Logistic Regression
5. Thursday 8/17: Decision Trees

Code Challenge

Friday 8/18

1. Gradient Descent
2. Logistic Regression
3. Classification modelling
4. Decision Trees

Phase 3 Projects

Still Groups if CC Passed

- Option to select curated dataset
- OR find and use your own
- Classification Project
- Encourage exploration of other models

Phase 3 Blog Post

Write a tutorial (with a data set and code sample) on something that you think might be interesting to other people taking the course. It can be a topic we didn't cover at all, or can just go deeper into a topic that we did cover. Your tutorial can use the same tool/library from the previous blog post, or you can choose something new. Potential elements to include:

- I. An introduction explaining why a data scientist would want to do what your tutorial does
- II. A section explaining the data set you're working with (what are the features? if there is a target, what is it?)
- III. A section explaining the libraries you're working with (ideally with links to documentation and/or tutorials for someone just getting started)
- IV. Well-commented code
- V. A conclusion section that recaps what you did and why

Feelings at the Start of Phase 3

Excited: Let's tackle Machine Learning!

Little Overwhelmed: Lots of new tools

Feelings at the End of Phase 3

Powerful: Modeling toolbelt

Capstone Stress Creep

Capstone Project

- Sneaking up!
- What can you do now?
 - Explore data!
 - [UCI Machine Learning Datasets Repository](#)
 - [Kaggle Datasets](#)
 - [Awesome Datasets Repo on Github](#)
 - [New York City Open Data Portal](#)
 - [Inside AirBNB](#)
 - [Data is Plural](#)
 - API and Web Scraping
